

Creating a Google reCAPTCHA profile

1. If you don't have a Google account, first create it on this Google site:
<https://accounts.google.com/signup/v2/webcreateaccount?flowName=GlifWebSignIn>
2. After that go to this website to create a reCAPTCHA profile:
<https://www.google.com/recaptcha/about/>
3. Click "v3 Admin console" from the top of the page that opens.
4. Sign into your Google account from the sign in view that opens if you are not signed in already.

Label ⓘ

0 / 50

reCAPTCHA type ⓘ

Score based (v3) Verify requests with a score

Challenge (v2) Verify requests with a challenge

Domains ⓘ

+ Add a domain, e.g. example.com

5. In the Label field, enter a name for the reCAPTCHA profile. The name acts as an identifier for you and helps you tell this profile apart from others you might create later.
6. Choose "Score based (v3)" as the reCAPTCHA type.
7. In the Domains part, define for which domain you want the reCAPTCHA to be used. You can check the domain of your subscription page from LianaMailer on Settings > Sites page. Enter the address in the form example.com (see image below). So if the address is subscription.example.com, discard the first part.

NB! If your subscription page is in formats mail-eur.net or mailpv.net, please contact our support team (support@lianatech.com) for further instructions.

8. Google might prompt you to create a Google Cloud Platform project. Add in a Project name.

Google Cloud Platform

It doesn't look like you've used Google Cloud before. We'll create a Google Cloud Platform (GCP) project for you below at no cost. We've made some changes to our platform. [Learn more about legacy keys.](#)

Project Name* 10 / 30

If you have used Google Cloud before, try [logging in](#) to a different Google account.

[^](#) **GOOGLE CLOUD PLATFORM**

9. Agree to the terms and conditions and Submit the form
10. Save settings by clicking Submit.
11. Copy both the Site key and the Secret key from the page that opens and send them to our support support@lianatech.com for further actions.
